

# *Do You Know The Future For Your Ponds And Lakes?*

**Earth Advisors shares your interest in preserving our shared natural environment. Our team of biologists, wetlands delineators, environmental scientists, landscape consultants have provided these services for associations, cities, developers, and homeowners for over 15 Years.**

We offer our environmental expertise to assist you in your goals of:

- Improving water quality in your natural or man-made lakes, ponds, and wetlands with health and condition evaluations, designing littoral buffering, and vegetation based filtration systems using wetland plants.
- Improving appearances while decreasing your environmental impact on the ground water and regional ecosystem.
- Increasing the value of properties by improving the natural aesthetic qualities and economical benefits.
- Reducing the need for irrigation and fertilizer by planning and designing sustainable landscapes that are maintainable and appropriate for developed properties
- Enjoy increased song birds and wildlife from improved water and landscapes.
